Dear Hiring Manager,

I am writing to express my interest in the **Senior Frontend Developer** position. With 7 years of experience, I specialise in **Angular (v9–v21)**, with strong working knowledge of React and Next.js, TypeScript, RxJS, and NgRx. I have led development of enterprise applications serving 10,000+ daily users, architected scalable micro frontend systems, and delivered measurable results including a 30% performance improvement and 40% reduction in regression defects through Cypress and Jest automation.

I have built accessible, WCAG 2.1-compliant interfaces, contributed to design systems, and worked across the full development lifecycle — from architecture through CI/CD and deployment. I collaborate closely with UX designers, product managers, and backend engineers, and have mentored a team of 5+ junior engineers through code reviews and architecture sessions.

I would welcome the opportunity to discuss how my skills align with your team's needs. Thank you for considering my application.

Sincerely,
Sumit Patidar
