

SUMIT PATIDAR

Senior Angular Developer · Frontend Architect · 6.5 Years Experience

+91 7223893390 · patidars110@gmail.com · Pune, India · [linkedin.com/in/sumit-patidar-774ba4152](https://www.linkedin.com/in/sumit-patidar-774ba4152)

PROFESSIONAL SUMMARY

Senior Angular Developer with 6.5+ years of hands-on experience building scalable, high-performance enterprise front-end applications. Expert in Angular (v9–v21, including latest v21 features), TypeScript, RxJS, and NgRx state management. Consistent track record in performance optimisation (30%+ improvement), responsive UI development, and writing clean, maintainable, security-conscious code. Strong communicator and code reviewer who thrives in collaborative, fast-paced Agile environments. Based in Pune and ready to contribute from day one.

TECHNICAL SKILLS

Angular (v9–v21): Signals, Deferrable Views (@defer), Control Flow (@if/@for/@switch), Standalone Components, Lazy Loading, Angular Universal (SSR), Partial Hydration, Angular Material 3, Module Federation (Micro Frontend)

State Management: NgRx (actions, reducers, effects, selectors, entity), RxJS (operators, subjects, schedulers, error handling), Angular Signals

Languages & Core Web: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap — fully responsive, cross-browser compatible UIs

Performance Optimisation: Lazy loading, OnPush change detection, virtual scrolling, bundle optimisation, tree shaking, Core Web Vitals improvement

Secure Coding: JWT authentication, RBAC, input validation, XSS prevention, secure API communication patterns

Design Patterns & OOP: SOLID principles, Observer, Strategy, Factory patterns — component-driven, scalable UI architecture

Testing: Jasmine, Karma, Jest (unit / TDD); Cypress (E2E / BDD); 90%+ coverage achieved

DevOps & Cloud: Azure DevOps (pipelines, repos, boards), GitHub Actions, GitLab CI, Docker, AWS (basic)

Tools & Collaboration: VS Code, Jira, Confluence, Git — Agile / Scrum delivery

Accessibility: WCAG 2.1 — semantic HTML, ARIA roles, keyboard navigation, colour contrast compliance

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Frontend | **VIT Infotech Pvt Ltd** *June 2019 – Present*

Enterprise software delivery for global hospitality and government product clients.

- Architected and delivered production Angular applications (v9–v21) for hospitality platforms with 10,000+ daily active users — reducing time-to-feature by 25% through reusable, modular component libraries.
- Adopted Angular v21 cutting-edge features: Signals for fine-grained reactivity, Deferrable Views (@defer) for optimised lazy loading, and new Control Flow syntax — measurably improving rendering performance and code readability.
- Drove a 30% improvement in application performance via OnPush change detection, lazy loading, virtual scrolling, and bundle optimisation — directly improving Core Web Vitals (LCP, FID, CLS) and reducing the bounce rate.
- Built fully responsive, cross-platform compatible UIs using SCSS and Tailwind CSS, meeting accessibility standards (WCAG 2.1) for keyboard navigation, screen readers, and colour contrast compliance.
- Designed and implemented NgRx state architecture across complex multi-step workflows — ensuring predictable, consistent data flow and making debugging and testing significantly easier.
- Applied SOLID principles and OOP design patterns (Observer, Strategy, Factory) across Angular services and feature modules — reducing technical debt and improving long-term maintainability.

- Enforced secure coding practices: JWT-based authentication, RBAC across multiple user roles, XSS-safe templating, and secure API communication — resulting in zero security incidents across all production systems.
- Championed test-first culture: elevated unit test coverage from ~40% to 90%+ (Jasmine/Karma); introduced Cypress E2E automation, cutting regression defects by 40%.
- Managed CI/CD via Azure DevOps and GitHub Actions — reduced deployment time by 35% and enabled zero-downtime releases.
- Conducted regular code reviews providing constructive, standards-driven feedback; mentored 4 junior engineers — two promoted to mid-level within 18 months.
- Collaborated closely with UX/UI designers and backend teams in Agile sprints — translating wireframes into pixel-perfect, performant Angular components.

KEY PROJECT HIGHLIGHTS

Stayntouch – Hotel Property Management System (PMS) *Jan 2022 – Present*

- Engineered booking, rate configuration, and real-time pricing modules with WebSocket-powered live data updates — zero lag at high concurrency across 50+ hotel properties.
- Led performance & accessibility initiative: resolved 120+ critical bugs, improved Lighthouse score from 58 → 87, and achieved full WCAG 2.1 compliance across all core user journeys.
- Implemented dynamic validation workflows and smart form state management with NgRx — reducing operator error rates by ~35%.

IB-X – AI-Based Workflow & RPA Platform *Jul 2025 – Present*

- Building Angular UI for an AI-driven automation platform — drag-and-drop workflow builder with AntV G6 graph visualisation, multiple node types, and real-time edge validation.

Central Warehousing Corporation (CWC) – Enterprise Platform *Feb 2021 – Dec 2022*

- Delivered internal employee management platform with multi-level approval workflows, 8-role RBAC, and training modules — zero unauthorised access incidents post-launch.

HRMS – Human Resource Management System *Aug 2019 – Jan 2021*

- Built payroll, attendance, and employee management from scratch — 99.9% accuracy for 200+ employees; JWT auth + RBAC with zero production security incidents over 2 years.

EDUCATION

Bachelor of Engineering – Computer Science *Aug 2015 – Apr 2019*

Rajiv Gandhi Proudlyogiki Vishwavidyalaya, Bhopal | GPA Equivalent: 84%
