PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 6.5+ years of expertise architecting high-performance, scalable enterprise web applications using Angular (v9–v21) and React. Proven track record of improving application performance by 30%, achieving 90%+ unit-test coverage, and reducing regression defects by 40% through rigorous E2E automation. Up to date with the latest Angular 21 features including Signals, Deferrable Views, Control Flow syntax, and SSR with Angular Universal. Experienced in building accessible, responsive UIs compliant with WCAG 2.1 standards, micro frontend architecture, and collaborating with cross-functional Agile teams to deliver exceptional user experiences. Actively leverages GenAI tooling to accelerate development velocity and improve code quality.

TECHNICAL SKILLS

Frontend: Angular (v9–v21 incl. latest), React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Bootstrap, Responsive Design, SPA Architecture

Accessibility: Web Accessibility (WCAG 2.1) — semantic HTML, ARIA roles, keyboard navigation, screen reader compatibility, colour contrast compliance

Angular (v9–v21): Signals, Deferrable Views (@defer), Control Flow (@if/@for/@switch), Standalone Components, Lazy Loading, Angular Universal (SSR), Partial Hydration, Angular Material 3, Micro Frontend (Module Federation)

Angular State & Reactivity: RxJS, NgRx, Angular Signals — fine-grained reactivity, signal-based components, computed & effect APIs

Architecture: Component-Driven Development, Design Patterns (SOLID, Observer, Strategy), Scalable UI Systems, Performance Optimization

Testing: Karma, Jasmine, Jest (Unit), Cypress (E2E), Testing Library, TDD/BDD

Backend & APIs: Node.js, Express.js, Core Java, REST APIs, GraphQL (exposure)

DevOps & Tools: GitHub Actions, GitLab CI, CI/CD, Docker, AWS (basic), Git, VS Code

AI & Productivity: GitHub Copilot, Cursor IDE, Antigravity — code completion, automated reviews, test generation

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Frontend | *VIT Infotech Pvt Ltd* June 2019 – Present

IT services company delivering enterprise software solutions for global hospitality and government clients.

- Architected and led frontend development of enterprise Angular applications serving hospitality platforms with 10,000+ daily active users, reducing time-to-feature by 25% through modular, reusable component libraries.
- Adopted latest Angular 21 features including Signals for fine-grained reactivity, Deferrable Views (@defer) for optimised lazy loading, and new Control Flow syntax (@if/@for) — improving rendering performance and code readability.
- Drove a 30% improvement in application performance by implementing lazy loading, OnPush change detection, virtual scrolling, and bundle optimization — improving Core Web Vitals scores and reducing bounce rate.
- Implemented WCAG 2.1 accessibility standards across UI components — including semantic HTML, ARIA roles, keyboard navigation, and colour contrast compliance — ensuring inclusive experiences for all users.
- Championed a test-first culture: elevated unit test coverage from ~40% to 90%+ using Karma/Jasmine and introduced Cypress E2E automation, cutting regression defects by 40% across release cycles.
- Designed and enforced scalable micro frontend architecture patterns, enabling independent team deployments and reducing inter-team merge conflicts by over 60%.

- Integrated RESTful APIs with backend services and implemented robust NgRx state management, improving data consistency across complex multi-step workflows.
- Established CI/CD pipelines via GitHub Actions and GitLab CI with AWS deployments — reduced deployment time by 35% and enabled zero-downtime releases.
- Mentored 4 junior engineers through structured code reviews, pair programming, and architecture sessions, enforcing code quality standards — two were promoted to mid-level within 18 months.

NOTABLE PROJECT EXPERIENCE

Stayntouch – Hotel Property Management System (PMS) Jan 2022 – Present

- Engineered booking, rate configuration, and real-time pricing modules consumed by hotel operations across 50+ properties; optimized UI rendering to handle high-concurrency data updates with zero visible lag.
- Architected complex validation workflows and dynamic configuration systems, reducing operator error rates by an estimated 35% through smart form state management and inline contextual guidance.
- Led UI stabilization and accessibility initiative — resolved 120+ critical bugs, improved Lighthouse score from 58 to 87, and ensured WCAG 2.1 compliance across core user journeys.

IB-X – AI-Based Workflow & RPA Platform Jul 2025 – Present

- Developing UI for an AI-driven RPA/BPA platform using Angular, enabling users to build and manage automation workflows through a drag-and-drop interface.
- Built a graph-based workflow builder using AntV G6 for node-based visualization, supporting multiple node types with real-time edge validation.

Central Warehousing Corporation (CWC) Feb 2021 – Dec 2022

- Built an internal employee management platform for CWC handling multi-level approval workflows, employee training modules, and feedback systems — streamlining HR operations across the organization.
- Implemented role-based access control spanning 8 user roles, ensuring secure access to approvals, training records, and feedback data with zero unauthorized access incidents post-launch.

HRMS – Human Resource Management System Aug 2019 – Jan 2021

- Built payroll, attendance, and employee management modules from scratch, processing payroll for 200+ employees with 99.9% accuracy post-automation.
- Implemented JWT-based secure authentication and granular role-based access, achieving zero security incidents in production over 2 years.

EDUCATION

Bachelor of Engineering – Computer Science Aug 2015 – Apr 2019

Rajiv Gandhi Proudlyogiki Vishwavidyalaya, Bhopal | GPA Equivalent: 84%

CERTIFICATIONS

Meta Front-End Developer Specialization 2025

Coursera • Front-End Development, JavaScript, React Basics & Advanced React
