PROFESSIONAL SUMMARY

Results-driven Senior Angular Frontend Developer with 6.5+ years of expertise building modular, scalable, and maintainable enterprise web applications using Angular 17+, TypeScript, and modern UI frameworks. Proficient in creating responsive, interactive UIs from wireframes and prototypes — collaborating closely with UX designers, product managers, and backend teams to deliver user-centered experiences. Proven track record of improving application performance by 30%, achieving 90%+ unit-test coverage, and enforcing high coding standards through structured code reviews. Always up to date with the latest Angular releases and best practices.

TECHNICAL SKILLS

Frontend: Angular (v9–v21 incl. 17+), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Responsive Design, SPA Architecture

UI Frameworks: Angular Material 3 (expert), Kendo UI (familiar), Bootstrap — design systems, component libraries, wireframe implementation

Angular Ecosystem: Signals, Deferrable Views (@defer), Control Flow (@if/@for), Standalone Components, Reactive Forms, Lazy Loading, Angular Universal (SSR), Micro Frontend (Module Federation)

State Management: NgRx, RxJS, Angular Signals — scalable state across large frontend codebases

UI/UX: Wireframe-to-UI implementation, prototype development, user-centered design principles, WCAG 2.1 accessibility

Testing: Karma, Jasmine, Jest (Unit), Cypress (E2E), TDD/BDD — 90%+ coverage standard

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL (exposure)

DevOps & Cloud: GitHub Actions, GitLab CI, CI/CD, Docker, AWS (basic), Azure (familiar), Git

AI & Productivity: GitHub Copilot, Cursor IDE — code completion, automated reviews, test generation

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Frontend | VIT Infotech Pvt Ltd

June 2019 – Present

IT services company delivering enterprise software solutions for global hospitality and government clients.

- Implemented responsive and interactive user interfaces using Angular 17+ — building modular, scalable, and maintainable code serving 10,000+ daily active users across enterprise platforms.
- Developed mockup screens from wireframes and prototypes using HTML5, CSS3, Angular Material, and open libraries — collaborating closely with UX designers and product managers to deliver pixel-perfect, user-centered interfaces.
- Stayed current with the latest Angular releases (through v21) — adopting Signals, Deferrable Views (@defer), and new Control Flow syntax to continuously enhance development processes and performance.
- Drove a 30% improvement in application performance through lazy loading, OnPush change detection, virtual scrolling, and bundle optimization — ensuring high performance and responsiveness across all devices.
- Collaborated with backend developers to integrate frontend components with REST APIs — ensuring seamless integration and high performance across complex multi-step workflows.
- Championed TDD: elevated unit test coverage from ~40% to 90%+ using Karma/Jasmine/Jest and introduced Cypress E2E automation, cutting regression defects by 40%.
- Established and enforced coding standards through structured code reviews — ensuring maintainable, high-quality codebases across the team.
- Established CI/CD pipelines via GitHub Actions and GitLab CI with cloud deployments on AWS — reduced deployment time by 35% and enabled zero-downtime releases.
- Mentored 4 junior engineers, conducted usability feedback sessions, and continuously identified process improvement opportunities — two promoted to mid-level within 18 months.

NOTABLE PROJECT EXPERIENCE

Stayntouch – Hotel Property Management System (PMS)	Jan 2022 – Present
- Built responsive booking, rate configuration, and pricing modules for 50+ global properties — implemented from Figma wireframes using Angular Material with complex Reactive Forms and dynamic validations. - Led UI stabilization and performance initiative — resolved 120+ bugs, improved Lighthouse score from 58 to 87, and gathered iterative user feedback to enhance operator experience.	
IB-X – AI-Based Workflow & RPA Platform	Jul 2025 – Present
Developing Angular UI for an AI-driven RPA/BPA platform — drag-and-drop workflow builder with modular, reusable component architecture designed for scalability.	
Central Warehousing Corporation (CWC)	Feb 2021 – Dec 2022
Built internal employee management platform with multi-level approval workflows, training modules, and feedback systems — RBAC spanning 8 user roles with zero unauthorized access incidents post-launch.	
HRMS – Human Resource Management System	Aug 2019 – Jan 2021
Built payroll, attendance, and employee management modules processing payroll for 200+ employees with 99.9% accuracy — JWT authentication and RBAC with zero security incidents over 2 years.	

EDUCATION

Bachelor of Engineering – Computer Science	Aug 2015 – Apr 2019
Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopal GPA Equivalent: 84%
