PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 6.5+ years of expert-level proficiency in Angular and React.js, building high-performance, scalable enterprise web applications for global financial and product platforms. Deep expertise in TypeScript, core JavaScript design patterns, RxJS, NgRx, and AG Grid for complex data-driven UIs. Proven track record of improving application performance by 30%, achieving 90%+ unit-test coverage, and delivering accessible, responsive interfaces compliant with WCAG 2.1 standards. Actively leverages AI-assisted development tools including GitHub Copilot to accelerate development velocity. Strong leadership and communication skills with a proven ability to mentor teams and drive engineering excellence.

TECHNICAL SKILLS

Frontend: Angular (v9–v21), React.js (v11+), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SCSS, Bootstrap, Responsive Design, SPA Architecture

Angular Ecosystem: Signals, Deferrable Views (@defer), Control Flow, Standalone Components, Angular Material 3, Micro Frontend (Module Federation), Angular Universal (SSR)

Data Grid: AG Grid — complex table configurations, virtual scrolling, custom cell renderers, server-side row models, filtering and sorting for large datasets

State Management: NgRx, RxJS, Redux, Angular Signals — fine-grained reactivity across large-scale frontends

Accessibility: WCAG 2.1 — semantic HTML, ARIA roles, keyboard navigation, screen reader compatibility, colour contrast compliance

Testing: Jest, Karma, Jasmine (Unit), Cypress (E2E), TDD/BDD — 90%+ coverage standard

Architecture: Component-Driven Development, Design Patterns (SOLID, Observer, Strategy, Factory), Performance Optimization, Scalable UI Systems

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL (exposure)

DevOps & Cloud: GitHub Actions, GitLab CI, CI/CD, Docker, AWS (basic), Git

AI & Productivity: GitHub Copilot, Cursor IDE — AI-assisted code completion, automated reviews, test generation

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Frontend | *VIT Infotech Pvt Ltd* June 2019 – Present

IT services company delivering enterprise software solutions for global hospitality and government clients.

- Architected and led development of enterprise Angular and React applications serving 10,000+ daily active users — applying expert-level design patterns, component architecture, and core JavaScript fundamentals across complex, large-scale codebases.
- Implemented AG Grid for complex data-driven UIs — configuring virtual scrolling, custom cell renderers, server-side row models, and advanced filtering for high-volume financial and operational datasets.
- Drove a 30% improvement in application performance through lazy loading, Deferrable Views, OnPush change detection, and bundle optimization — improving Core Web Vitals scores and reducing bounce rate.
- Implemented WCAG 2.1 accessibility standards across UI components — semantic HTML, ARIA roles, keyboard navigation, screen reader compatibility, and colour contrast compliance.
- Championed TDD culture: elevated unit test coverage from ~40% to 90%+ using Jest/Karma/Jasmine and introduced Cypress E2E automation, cutting regression defects by 40%.
- Actively leveraged AI-assisted development tools including GitHub Copilot for code completion, automated code reviews, and test generation — improving team velocity and code quality.
- Designed scalable micro frontend architecture using Module Federation — reducing inter-team merge conflicts by 60% and enabling independent team deployments.
- Integrated RESTful APIs with NgRx and Redux state management — ensuring reliable data consistency across complex multi-step financial workflows.

- Established CI/CD pipelines via GitHub Actions and GitLab CI — reduced deployment time by 35% and enabled zero-downtime releases.
- Led and mentored 4 junior engineers through code reviews and architecture sessions, enforcing engineering standards — two promoted to mid-level within 18 months.

NOTABLE PROJECT EXPERIENCE

Stayntouch – Hotel Property Management System (PMS) Jan 2022 – Present

- Engineered booking, rate configuration, and pricing modules for 50+ global properties — implemented AG Grid for high-volume operational data tables with server-side row models and custom renderers.
- Architected complex validation workflows and dynamic configuration systems, reducing operator error rates by 35%. Improved Lighthouse score from 58 to 87 through performance optimization.

IB-X – AI-Based Workflow & RPA Platform Jul 2025 – Present

- Developing Angular UI for an AI-driven RPA/BPA platform — drag-and-drop workflow builder using AntV G6, composable and reusable component architecture.

Central Warehousing Corporation (CWC) Feb 2021 – Dec 2022

- Built internal employee management platform with multi-level approval workflows, training modules, and feedback systems — RBAC spanning 8 user roles with zero unauthorized access incidents.

HRMS – Human Resource Management System Aug 2019 – Jan 2021

- Built payroll, attendance, and employee management modules processing payroll for 200+ employees with 99.9% accuracy — JWT authentication and RBAC with zero security incidents over 2 years.

EDUCATION

Bachelor of Engineering – Computer Science Aug 2015 – Apr 2019

Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopal | GPA Equivalent: 84%

CERTIFICATIONS

Meta Front-End Developer Specialization 2025

Coursera • Front-End Development, JavaScript, React Basics & Advanced React

Agile with Atlassian Jira 2025

Atlassian • Coursera • Scrum, Kanban, Sprint Planning, Jira & Confluence
